

umpers has "authorized" the receiver of Interbay drainage district, who he appointed, to receive taxes, although two circuit courts in the state have forbidden the collection of taxes. Appointment of a receiver was made on application of a non-resident bondholder. Owners in the district have appealed to the federal court of appeals and another suit is pending in the state supreme court. This mix-up is a sample of what overglades district and its sub districts probably will have to go

A "FRIENDLY SHOOTING"
Albert Hendry and Perry Albritton were tusseling on a barge at a Kissimmee river and Perry got mad and shot Albert. At the Fort Pierce hospital it was found the wound was not serious. Albritton

Mr. O'Bannon also stated that it is the duty of the operator of each place of business to post his occupational license in a conspicuous place. This will avoid confusion.

to give prospect of a yield sufficient for the land is double cropped; if there is the spring on the same ground the region. When 12,000 acres is uncultivated it carries two crops that is the equivalent of 24,000 acres of single crop.

to load one freight car. Some is a crop in the fall and a crop rate is three acres to a car for cultivation and 3,000 acres equivalent of 15,000 acres and 15-

Kissimmee river to connect Indian Prairie canal section of No. 29 with the Eagle Bay. It has been asked almost every time the work on the Indian Prairie road is mentioned. The answer seems to be "Yes," for at the September 10 meeting of the road board Chairman Bantley was authorized to apply to the War Department for approval of the construction of a bridge over Kissimmee river at a bridge over Kissimmee river.

there on account of the drought.

CANAL POINT

Mr. and Mrs. W. P. T. Geiger left Saturday for Tennessee to be gone for some time.

Orin Camp and wife of Okeechobee moved in one of the apartments in the Todor house this week.

Because a Canal Point man did not get in on the federal seed loan, he had to go to work himself this week. He has leased some land on

credit and was figuring on getting some money from the government so he could hire somebody to work the land for him.

Mr. and Mrs. Jesse Baas, who have been visiting in Georgia all summer, have returned to Canal Point and have taken an apartment in the Todor house.

A Canal Point man is reported to have been arrested this week on a federal warrant charging violation of the migratory bird act. Arrests on the same charge have been made on the east coast. This

suggests it would be a good idea for parents to stop their boys from killing birds with slingshots; a deputy U. S. marshal may put the boys in jail.

Fred Chastling of Georgia is farming one of Charles Tedder's farms and two other 20-acre farms are being farmed by the Barwick brothers.

G. B. McGuire, who has been recruited to Okeechobee as district manager for the refrigerator car company, made a quick trip to East Beach Tuesday to see the beach fields and figure out when the calls will start for seed cars. He was accompanied by E. W. Smith, manager at Okeechobee for the Florida Power & Light Company. Mr. McGuire spent part of the summer in New York on California grapes. He is back in the beach deal a month earlier than usual because bean picking is starting that much earlier.

Mrs. E. E. Madari, who has been visiting relatives in Georgia for the past three months, returned home Saturday. Her mother Mrs. Wathers and sister Mary accompanied her for a short visit here.

Mrs. Al Baker spent the week and the Lake Worth as guest of her sister, Mrs. Tom Reed. Kenneth Swain is spending the week in Lake Worth with relatives.

William West, A. E. Robinson and Alice Butt of Pompano, the Hammann Demonstration Company,

operating a large farm west of Pompano, were callers in Canal Point Wednesday. Mr. West and Mr. Robinson represent the estate of the late Captain Hammann who owned the section on which a portion of the Canal Point townsite joins and which is now in the possession of the sugar company under a contract to buy. During the summer Mr. Robinson was in Europe. Mr. West lived in Canal Point while the Hammann farm was operated by its then owner.

Mrs. W. A. Adams is at Jacksonville, subpoenaed as a witness in the federal court in the case of Claude Coleman, former postmaster. Mrs. Kromer is working in the post office in her absence.

P-T. A. MEETING

P-T. A. meeting Monday night, October 6, at 8 o'clock. All members and persons interested are urged to be present. Anyone interested in school and community work is "eligible for membership."

LAKEPORT ROAD

Stakes have been set by the State Road Department surveyors on the 11 miles of route of stage road No. 29 between Kissimmee river and Indian Prairie canal in Glades county and equipment is being put on the site by Reedy Bryan Company of Auburndale, contractors.

SHIPPERS CONTENT WITH JOINT EXPRESS AGENCY

Sentiment, so far developed to this time, is against an express agency separate from the railroad agent. It is the opinion of the "mail order men" that they will get better service from an agent from an agent who is not a salary man. They say that what best serves them is to the best advantage of the railroad.

Likewise the opening of express offices at Pelican Lake station south of Okeechobee and Sand Cut siding north of Canal Point is opposed on the ground that it is better for the growers to bring their stuff over to a central point where the buyers congregate.

The proposal for a separate express agency grows out of a belief that the approaches to the express shed are bad and there is no parking platform space and parking space.

JUVENILE COURT CASE

Silvery, the 11-year-old son of Buck Tillman of Canal Point, Wednesday was turned over to County Judge Robbins of the juvenile court, following arraignment in Judge Hartridge's court of criminal record on a charge of shooting Mrs. A. H. Horn of Canal Point with a .22 caliber rifle Tuesday. The shot is said to have been fired because Mrs. Horn declined to stop the car and pick the boy up when he tried to waive the car down. The bullet lodged under the right breast and the injury, treated by Dr. D. S. Spooner, is serious but is not expected to prove fatal.

HOW MUCH SEED, WHEN MATURES

Even the experienced truck farmer does not always remember right off-hand how much seed to plant to the acre and how long it takes for vegetables to grow to maturity after planting. The following figures are taken from Kilgore Seed Company's catalogues.

Bans, plant three pecks to the acre: Black Valentine 43 days, Giant Stringless 43 days, Red Valentine 46 days, Redfingers 50 days, Bountiful 46 days, Fordhook lima, plant one bushel to the acre; make in 65 days.

Beets, four pounds of seed to sow an acre, make in 68 to 75 days; sow quarter to half pound of seed to acre. Cut in 115 days.

Cabbage, Charleston Wakefield 85 days; carrots 85 to 90; sweet corn 65 to 80 days depending on variety; Eggplant, 110 to 115 days; okra 45 days.

Peas one to 2 bushels of seed to acre; Telephone 55 days, Little Marvel 50 days, Parsnips 120 days, Pepper, World Beater 115 days, Ruby 115 days, California Wonder 125 days.

Potatoes: Red Bliss 73 days, Russets 21 days; spinach 110 days; squash 50 days, Marglobe 98 days.

Egyptian wheat 120 days, Kaffir corn 90 days, Valencia peanuts 100 days; velvet beans 120 days.

POULTRY EXPERT JOINS TEST STATION'S STAFF

Following his appointment to the position of farm foreman at the Everglades experiment station, R. W. Kidder arrived recently with his family and has taken up residence upon grounds of the station east of Belle Glade.

Mr. Kidder is a graduate of Michigan State College, class of 1923, where he specialized in dairy production. Immediately following the completion of his work at the College of Agriculture he took over the management of a large dairy farm near Janesville, New York, and continued in this work for three years. Following this experience he was appointed agricultural agent for Monroe county, Michigan, and took active part in the corn breeder campaign that developed to such important proportions during the period. He resigned from county agent work in 1929 and was engaged in a private poultry enterprise at the time of accepting the Florida position.

Aside from his regular duties Mr. Kidder plans to develop small poultry and dairy units of sufficient size to meet the needs of the small community at the experiment station. Careful records will be kept upon these and they will be self-supporting in either case. Aside from convenience in supplying these necessities to the several families in residence there will be developed a considerable amount of preliminary information which will be useful at such time as it is found that the various phases of live stock work upon a definite project basis. On account of the importance of such studies to the animal possibilities for livestock production in the Everglades area it is hoped that this latter work may be organized in the near future.

COMMUNITY GOSSIP

Betty, the little daughter of Professor and Mrs. Speer, asked why the frogs were croaking and was told the frogs were asking for rain. "They need not ask me for rain; I haven't got any," Betty said; "they had better ask God for it."

The lady who is still remembered by most Canal Point people as Miss Horn, although she has been married for more than three years, was subpoenaed to be a witness in Claude Coleman's trial but was excused because she has two babies to look after.

The editor of this paper is strongly in favor of somebody building a hotel in Canal Point, so strangers who are motoring through won't call him out of bed and tell him they want a room for the night.

Somebody is loading sand from the canal bank and hauling it somewhere and to load the sand he has to cut down the weeds. This is O. K. Now when the editor is loading at Baker's root beer joint he can see the printing office door and catch mail who is there. He is calling at the printing office a cash customer or a bill collector or a politician.

Somebody asked Hans Andersen if he was the Hans Andersen that wrote the fairy tales "No," he said, "I'm the Hans Andersen that tells them."

SOME OF THE BULL WAS PEDDLED HERE, TOO

"Peddle the bull" is a phrase that describes exaggerations and statements that are true in the future or were true in the past but are not quite true right now. This story comes from Clewiston where the big talking point for the sale of town lots was that B. G. Dahlberg was going to put in the world's biggest cotton plant.

Two youths were arrested and were having an examination. In the course of the hearing the magistrate stopped the prosecuting attorney and said: "Let me get this right. Do I understand that you claim that this animal that you say the defendants took was a male calf, a bull?"

"Yes, your honor."

"And you claim that they killed this bull calf and skinned it and quartered it and went from place to place offering the meat for sale—that they peddled it?"

"Yes, your honor, that is the contention of the prosecution."

"The prisoners are discharged," the magistrate announced; "It is not against the law in Clewiston to peddle the bull."

CONGRESSMAN OWEN TO SPEAK AT OKEECHOBEE

Ruth Bryan Owen, congressman from the second Florida district, has written to the committee men in Okeechobee asking that arrangements be made for a meeting to hold there October 11. Mrs. Owen wrote from Washington and said she desired to make "her annual report."

KILL THEM TODAY

2 CENTS PER 100—3 CENTS PER 100 MONEY BACK IF IT FAILS

MAIN'S CORNER ROAD Because state road No. 25 between the Palm Beach county line and Fort Myers will not be completed in the coming tourist season, request has been made that the State Road Department take over the road between LaBelle and Main's Corner in Glades county as a "betterment project." State road No. 25, also known as Palm Beach highway, does not run through Moore Haven; it extends from Clewiston south of Moore Haven to Main's Corner, where it connects with the LaBelle road. The Moore Haven road can be used for the purpose of a detour while state road No. 25 is being built.

NOTICE

State and County

OCCUPATIONAL LICENSES

are due and payable to the County Tax Collector October 1st of each year. Under the laws of Florida, it is illegal for any person, firm or corporation to carry on any business, occupation or profession in the County, subject to the payment of license tax, without first procuring a license for such business, occupation or profession. Therefore, please obtain your occupational license without delay.

EXTRA VALUE WITHOUT EXTRA COST

THE constant effort of the Ford Motor Company to find ways to give you greater and greater value without increase in price—frequently at lowered price. This applies not only to the manufacture of the car, but by many other important factors that concern its usefulness to millions of people.

Because the Ford is made economically, distributed economically, serviced economically—and because it runs economically—it is a value far above the price you pay. Among its outstanding features are the Triplex shatter-proof glass windshield, Rustless Steel, five steel-spoke wheels, four Houdall double-acting hydraulic shock absorbers, large number of ball and roller bearings, the exclusive use of fine steel forgings and unusual accuracy in manufacturing.

Pick out some roads and hills you think are bad and call or phone for demonstration.
